

## Crop circles and other physical traces associated with UFOs reported in Canada

- \*188007      East Kent, Ontario  
In July of 1880, David Muckle and W.R. McKay heard a sudden loud report. They turned to see a cloud of stones flying upward from a spot in a field. They examined the spot, which was circular and about 16 ft. across. There was no sign of an eruption nor anything to indicate the fall of a heavy body there. The ground was simply swept clean. (*Scientific American*, July 10, 1880).

- 64 Ballantrae, Ontario  
Local residents found an area 50 foot in diameter cleared of vegetation. At the outer edge the ground was seared to a crisp, leaving bits of charcoal. The outer ring was about 3 feet wide. Five years later, no vegetation had grown. Above the circle, tall 100 foot high oak trees still grow, but the branches which hung over the circle are dead. It is estimated [that] the time of the landing was June, 1964, as numerous UFOs were reported in that area at the time.
